WHERE
GRANADA is the capital of the southern Spanish province of the same name, situated in the eastern part of the region of Andalusia. Geographical and scenic diversity characterizes this land. There is the coastal area with its warm climate and the mountainous regions with a colder climate, where one finds the 3.481 meter Mulhacén, the highest peak of the peninsula of Spain. The city of Granada has been shaped by the hills brimming with steep, narrow streets, beautiful nooks and crannies, and marvelous landscapes - hills where the old districts in of the Albayín and the Alhambra Palace were founded. The new part of the city is situated on the plain, crisscrossed by the large streets of Gran Vía de Colón and Calle de los Reyes Católicos, and where the busy streets around the Cathedral are found. Today, Granada has been declared a World Heritage Site, along with the Generalife and the Albayín.
